- Django REST Framework
- REST API Design
- Separation of Concerns
- Service & Selector Pattern

TOOLS

- Git / GitFlow
- Docker
- Linux

DATABASES:

- PostgreSQL
- Redis
- SQLite

About Me

Backend developer with 1.5 years of hands-on experience building web applications with Python and Django. Focused on the Django ecosystem, API development, and building reliable backend systems, with a strong passion for continuous learning and improving engineering skills.

WORK EXPERIENCE

SetarehAds:

- A freelance web application developed for the “ستاره طلایی” advertising company (with a blog system, authentication, etc.).
- Implemented the frontend interface for the project.

Confidential Backend Project:

- Private API-based backend project built with Django REST Framework, PostgreSQL, and Redis caching, following a Service & Selector architecture.

ElevenMarkets_APP:

- Accounting application for managing products, customers, invoices, and financial transactions.

journey_to_the_west:

- A semi-professional blog designed from the ground up, featuring highlighted search, similar post suggestions, and customizable sharing points.
